### **DETAILED ACTION**

1. Request for continued examination was received, with amendment, on November 18, 2008.
2. Claims 1-9 are pending and have been fully considered.

### ***Allowable Subject Matter***

3. Claims 1-9 would be allowed pending resolution of the double patenting rejections.
4. The following is a statement of reasons for the indication of allowable subject matter: Claim 1 requires a specific p-type complex oxide and a specific n-type complex oxide to be present. The p-type oxide is known in the art, as shown in the final office action. The n-type complex oxide has been amended to require both nickel and one of the elements Ti, V, Cr or Cu to all be present. This overcomes the found prior art. A chemical formula is interpreted to be a closed composition, therefore, since a n-type material is not found to contain these elements in these proportions in prior art, claims 1-9 are found allowable.

### ***Double Patenting***

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422

Art Unit: 1795

F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 1-9 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 4, 5, 8, 9, 12, 13 and 14 of copending Application No. 10/574,844. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of application 10/574,844 fully encompass the material included in the instant application. Therefore the claims of the instant application are rendered obvious over application 10/574,844.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

7. Claims 1-9 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 8 and 9 of copending Application No. 11/174,219. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of application 11/174,219 fully encompass the material included in the instant application. Therefore the claims of the instant application are rendered obvious over 11/174,219.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
